

Chapter 5 Pulse Modulation: Transition from Analog to Digital Communications 190

- 5.1 Sampling Process 191
- 5.2 Pulse-Amplitude Modulation 198
- 5.4 Completing the Transition from Analog to Digital 203
- 5.5 Quantization Process 205
- 5.6 Pulse-Code Modulation 206
- 5.10 Theme Examples 220 [TDM]

Chapter 6 Baseband Data Transmission 231

- 6.1 Baseband Transmission of Digital Data 232
- 6.2 The Intersymbol Interference Problem 233
- 6.3 The Nyquist Channel 235
- 6.4 Raised-Cosine Pulse Spectrum 238

Chapter 9 Noise in Analog Communications 364

- 9.1 Noise in Communication Systems 365
- 9.2 Signal-to-Noise Ratios 366
- 9.3 Band-Pass Receiver Structures 369
- 9.4 Noise in Linear Receivers Using Coherent Detection 370
- 9.5 Noise in AM Receivers Using Envelope Detection 373
- 9.6 Noise in SSB Receivers 377
- 9.7 Detection of Frequency Modulation (FM) 380
- 9.8 FM Pre-emphasis and De-emphasis 387

Chapter 11 System and Noise Calculations 437

- 11.1 Electrical Noise 438
- 11.2 Noise Figure 442
- 11.3 Equivalent Noise Temperature 443
- 11.4 Cascade Connection of Two-Port Networks 445
- 11.5 Free-Space Link Calculations 446
