

3.2 Terminal Characteristics of Junction Diodes (pp.147-153)

HO: The Junction Diode Curve

HO: The Junction Diode Equation

A. The Forward Bias Region

$$i_D = I_s \left(e^{v_D/nV_T} - 1 \right)$$
$$\approx I_s e^{v_D/nV_T} \quad \text{for } v_D \gg nV_T$$

Example: $I_s = 10^{-12}$, $n=1$

v_D (V) i_D

0.4

0.5

0.6

0.7

0.8

0.9

$$v_D \approx 0.7 \text{ V}$$

a)

b)

HO: The Junction Diode Forward Bias Equation

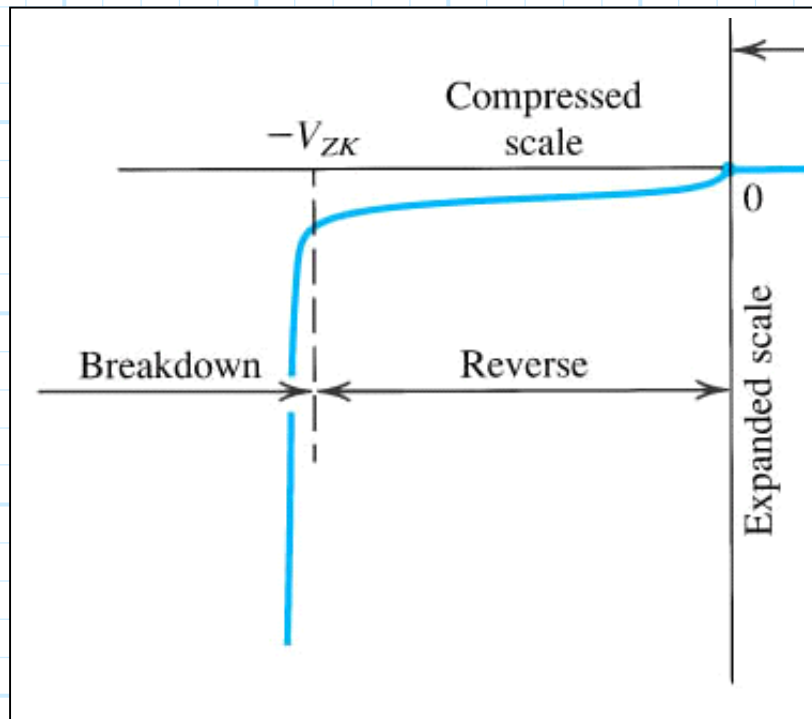

HO: Example: A Junction Diode Circuit

B. The Reverse Bias Region

$$i_D = I_s \left(e^{v_D/nV_T} - 1 \right)$$
$$\approx -I_s \quad \text{for } v_D \ll -nV_T$$

HO: Forward and Reverse Bias Approximations

C. The Breakdown Region

D. Power Dissipation in Junction Diodes
