## Special Problem 2-4.2

Rewrite the discrete vector A in terms of a set of orthonormal base vectors  $\hat{b}_1$ ,  $\hat{b}_2$ ,  $\hat{b}_3$ ; where:

$$\mathbf{A} = 3 \, \hat{a}_{x} + 2 \, \hat{a}_{y}$$

and

$$\hat{a}_x \cdot \hat{b}_1 = \frac{1}{\sqrt{2}}$$

$$\hat{a}_{1}\cdot\hat{a}_{y}=\frac{1}{\sqrt{2}}$$

$$\hat{a}_x \cdot \hat{b}_2 = 0$$
  $\hat{a}_x \cdot \hat{b}_3 = \frac{1}{\sqrt{3}}$ 

$$\hat{a}_x \cdot \hat{b}_2 = 0 \qquad \hat{a}_x \cdot \hat{b}_3 = \frac{1}{\sqrt{2}}$$

$$\hat{b}_2 \cdot \hat{a}_y = 0 \qquad \hat{b}_3 \cdot \hat{a}_y = \frac{-1}{\sqrt{2}}$$
